

NEWS RELEASE

INTRODUCING THE A1200NG PRE ORDERING NOW OPEN

Cardiff, 23rd December 2024

Following on from the successful launch of the A600GS, AmigaKit Ltd is pleased to announce the new A1200NG motherboard.

A1200NG fits perfectly into an original or reproduction Amiga 1200 case giving you a new replacement motherboard powered by similar technology as found in the popular **A600GS**.

The motherboard is powered by ARM processor with 4GB system memory and either 64GB or 128GB hard drive storage. Wireless internet is available for downloading system updates or using internet enabled applications. Bluetooth is also available for connection to selected speakers, keyboards and game pads.

Connect a real 880k or 1.76MB floppy drive to the A1200NG and read/write to floppy disks. Greaseweazle and DrawBridge technology are built into the board.

The side port of the **A1200NG** accepts compact flash cards or USB flash drives for quickly and easily transferring data.

Connect the Amiga 1200's original keyboard or alternatively use a USB or Bluetooth keyboard.

A1200NG runs the same system software as the **A600GS** which has been extensively updated and matured over the last year adding many user requested features.

AmiBench is pre-installed on the **A1200NG** computer system. It opens the desktop environment in high resolution 1080p with True Colour icons. It can use the new **ARM Graphics Library** for various purposes including faster rendering of windows, icons and backgrounds.

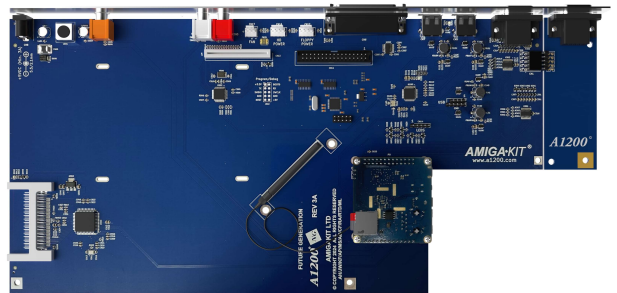

Other OS versions can be loaded onto the system with custom partitions if you own the corresponding ROM image and files.

The ARM CPU board is removable to accommodate possible future expansion options.

The **A1200NG** motherboard is due for delivery in the first quarter of 2025 with pre-orders being taken now:
